

Zane Jamal

My clientele require a variety of services to fully develop their projects. Therefore I am looking for people with certain areas of expertise to work with me to deliver a full range of services. Currently I require the following:

- **XHTML W3C compliant coder:** Able to take designs in Photoshop CS2 (PSD) format and code into XHTML 1.0 W3C compliant document with ease. The payment will vary slightly depending on each individual project but a standard range will be negotiated.
- **Wordpress coder:** Able to take blog designs – 3 pages [Home Page, Standard Page and Comment Page] in Photoshop CS2 (PSD) format and convert into a fully compliant and clean coded Wordpress theme (latest version). The pay per project will be fixed as each project will essentially be the same; converting 3 pages into a theme.
- **Javascript coder:** Ability to write Java and AJAX scripts for various functions. Degree of complexity is not likely to be very high. Work will not be regular and pay will vary depending on the project.

If you can fill any of the vacancies contact me at **jobs@zanejamal.co.uk**. Please remember to leave your contact details, the days you are available to work as well as your typical pay range (per standard page if applicable).

Many Thanks,

Zane Jamal
